PROFESSIONAL SUMMARY

Accomplished, CSPO® Certified Senior AI Technical Product Owner with 12+ years of enterprise IT experience, spanning 5+ years in Agile Product Leadership (4.3+ years in digital product ownership at TNQ + 7+ months leading AI platform workstreams at Ascendion + freelance and self-directed AI workflow automation & multimedia projects), 31+ months of continuous hands-on AI/GenAI architecture exploration, and 7+ years in Quality Engineering & Governance. Specialized in driving end-to-end AI product strategy, product discovery, and backlog prioritization for Generative AI applications, Retrieval-Augmented Generation (RAG) concepts, multi-agent AI workflows, and multimedia video pipelines. Proven track record translating complex business problems into structured Epics, User Stories, and Acceptance Criteria, establishing enterprise governance and security controls. Expert at bridging executive vision, data science/ML engineering, and enterprise software teams to deliver high-ROI technical solutions across cross-border US, UK, EU, and APAC engineering teams.

CORE COMPETENCIES & TECHNICAL SKILLS

- **AI Product Leadership:** AI Product Lifecycle, Product Discovery, Backlog Refinement, WSJF Prioritization, Multi-Agent Swarms, RAG Concepts, Roadmap Planning, Agentic AI Workflows
- **Product Ownership & Agile:** CSPO®, SAFe® 6 POPM (Udemy), User Stories, Acceptance Criteria, Definition of Ready (DoR), Backlog Management, Jira, Confluence, TestRail
- **Security & Governance:** Microsoft Entra ID RBAC, Responsible AI Guardrails, Single Sign-On (SSO), Identity & Access Management, Data Privacy Controls
- **Platform Operations & Delivery:** AAVA Enterprise AI Platform, Workspace Allocations, Entitlement Tiers, Multi-Tenant Isolation, Customer Success Enablement
- **AI Automation & Generative Media:** Google Vids, Multi-Account Asset Pipelines, Generative Video/Image Models (Veo & Imagen), Audio-Visual Synchronization, Prompt Architecture, n8n, Make.com, Claude LLM API, Python, Railway Cloud

PROFESSIONAL EXPERIENCE (CORPORATE EMPLOYMENT)

ASCENDION ENGINEERING PVT LTD | Bengaluru, India (Hybrid / Global Delivery)
AI Technical Product Owner / Senior Associate – Engineering [Jan 2026 – Aug 2026]

- **AI Platform Strategy & Roadmap:** Steered the product lifecycle and technical backlog for the AAVA enterprise AI platform; defined platform roadmap, multi-tenant allocations, and entitlement tiers to support ~50 enterprise users across high-visibility global workstreams.
- **Product Discovery & Backlog Management:** Led technical product discovery and workflow diagnostics, translating complex stakeholder pain points into structured Epics, User Stories, and acceptance criteria for multi-agent AI orchestration and platform features.
- **Agentic AI SDLC Automation Product:** Owned the product vision, technical dependencies, and backlog for an autonomous 4-agent end-to-end SDLC automation solution (Jira, GitHub, TestRail integration), compressing manual sprint testing preparation from days down to minutes.
- **TestRail Sub-Folder Fetching Feature:** Specced and prioritized the TestRail Automated Sub-Folder Fetching feature, specifying asynchronous API indexing and caching parameters to eliminate manual directory tree navigation and accelerate test-suite lookup.

- **Cross-Functional Stakeholder Bridge:** Served as the primary bridge between business stakeholders, ML engineers, software developers, and UX teams; facilitated discovery workshops and guided Customer Success Engineers on AI platform adoption.

TNQ TECHNOLOGIES PVT LTD | Chennai, India
Product Analyst / AI Product Owner (Product Owner & PM Responsibilities) [Aug 2020 – Oct 2024]

- **GenAI Integration & Product Discovery:** Pioneered GenAI product re-engineering by establishing requirements to integrate LLMs and RAG tools (ChatGPT, Claude) for automating customer communications and parsing manual backlogs.
- **Workflow Automation Product Delivery:** Designed and delivered automated product workflows that significantly compressed legacy document turnaround times and reduced manual operational effort across global enterprise accounts.
- **Agile Backlog & Sprint Execution:** Converted client business goals into prioritized backlogs, Epics, User Stories, and acceptance criteria; led sprint planning, refinement, reviews, retrospectives, and UAT with cross-functional Scrum teams.
- **Cross-Functional Alignment:** Orchestrated delivery alignment across software engineers, UX designers, QA teams, and enterprise client stakeholders in US, UK, and Europe, maintaining meticulous risk mitigation and release schedules.

TNQ TECHNOLOGIES PVT LTD | Chennai, India
Senior Software Test Engineer (Agile Delivery) [Aug 2014 – Jul 2020]

- **Quality Engineering & Governance:** Architected comprehensive test plans and test suites to ensure zero-defect software delivery for enterprise web applications; led defect triage and root cause analysis across complex multi-tier architectures.
- **Agile Technical Quality:** Managed bug lifecycles in Jira, validated hotfixes, and mentored a team of test engineers, establishing a deep technical quality background that directly informs acceptance criteria.

AIT RESOURCE INDIA PVT LTD | Chennai, India
Software Test Engineer [Jan 2013 – Jul 2014]

- **Software Quality Lifecycle:** Executed manual and functional testing cycles, logged defects, and verified cross-browser compatibility for client-facing digital platforms.

INDEPENDENT PROJECTS & FREELANCE INITIATIVES

(Self-Directed Innovation, Freelance Client Deliverables & Technical Prototyping)

- **AI-Powered Multi-Modal Video & Audio Production Pipeline (Robinson Musicals) [Aug 2026 – Present]:** Designed and executed an end-to-end generative AI media pipeline to convert raw vocal audio tracks into synchronized, cinematic video song productions.
  - Multi-Account Asset & Prompt Architecture: Engineered character consistency workflows across multiple accounts, establishing master visual anchors and structured prompt parameters.
  - Audio-Visual Synchronization: Solved tempo alignment and phoneme mapping challenges by synchronizing video scene blocks directly to master audio waveforms.
- **Make.com AI-Powered Job Screening & Workflow Orchestration [Aug 2026 – Present]:** Specced and built an AI-assisted workflow to reduce manual operational effort in international remote-job discovery, initial screening, and opportunity prioritization.
  - LLM-Based Screening & Routing: Integrated HTTP job retrieval, payload processing, Claude-based job description analysis, and JSON schema parsing to automate conditional shortlisting routes into Google Sheets and Google Drive.
- **n8n AI-Assisted International Job Discovery & Matching Automation [Aug 2026 – Present]:** Designed an AI-enabled orchestration flow to identify and prioritize international remote opportunities using configurable role, geography, and resume-fit criteria.

- Technical Prototyping on Railway: Deployed n8n on Railway containerized infrastructure, systematically evaluating and troubleshooting runtime execution, webhook endpoints, and API bottlenecks.

- **AI-Powered Digital Branding & Customer Acquisition Solution — Audiology Practice [Aug 2026]:** Designed and implemented an AI-assisted digital presence and service promotion solution for an audiology and speech therapy practice, integrating a custom business website, visual branding, and promotional video.
- **Continuous AI Technical Exploration & Discovery [Nov 2024 – Dec 2025 | 31 Months AI Focus]:** Built and deployed live interactive AI web applications using Python, Flask, HTML, CSS, and cloud platforms (Railway/Netlify), developing practical technical empathy for ML API contracts and vector retrieval concepts.

CERTIFICATIONS, TRAINING & EDUCATION

- **Product & Agile Certifications:** Certified Scrum Product Owner (CSPO®) | SAFe® 6 Product Owner / Product Manager (POPM) (Udemy) | PMI Agile Project Manager KickOff | Continuous Product Discovery | IT Business Analyst Training (COEPD)
- **AI & Technical Certifications:** Claude Certified | Agentic Fundamentals & Agent Design | AAVA 201 (Developer & QE Personas) | Generative AI (GitHub Copilot & Fundamentals) | Python Using AI Masterclass | ISTQB Foundation (ISQI)
- **Education:** B.Tech in Computer Science – Kalinga University (Distance Learning, 2015 – 2018) | PG Diploma in VFX – Loyola College (2010 – 2011) | Diploma in Tool Engineering – Institute of Tool Engineering (1998 – 2001)
